

Message of Chief Guest

Prof. V. Ramgopal Rao

It is pleasing to know that Indira Gandhi Delhi Technical University for Women is celebrating its 1st Research Excellence Award Ceremony on 24th December, 2021.

On this occasion, I wish to convey my heartiest congratulations to the Vice Chancellor, Dr Amita Dev, esteemed members of the faculty and Staff for this initiative of recognising and encouraging the research potential of the students and their mentors/ faculty members.

Research is a process of discovery and continuous learning. It is an intensive activity, but extremely fulfilling and the findings offer useful insights for policy decisions. I am happy to learn that IGDTUW is devoted to accelerate and sustain the scientific discovery and application of knowledge for betterment of humankind.

I extend my warm wishes to the recipients of the prestigious Research excellence awards and optimistically look forward to more contribution and commitment from them to take the University to greater heights in the arena of Research and Innovation.

Prof. V. Ramgopal Rao
