Message for First Research Excellence Award Ceremony

I am delighted to learn that the first ever Research Excellence Award Ceremony hosted by the Indira Gandhi Delhi Technical University for Women (IGDTUW) is scheduled for December 24th, 2021. I extend my best wishes to the faculty, staff and students of the institute who have taken up the responsibility of celebrating its achievers even during these unprecedented times. In my humble opinion, encouragement is key to success and organizing an award ceremony of this stature is sure to add several accolades to your vanity in the future.

I am aware that IGDTUW has overcome several challenges in its journey and has always stepped up to advance its skill set and knowledge in order to perform better than yesterday. I am excited to witness the success story that the students, staff and faculty will go on to write for IGDTUW and extend my wishes of a brighter future for the institute.

Research is the backbone of innovation and award ceremonies of this stature are an excellent platform to witness the potential of our researchers. While encouragement and appreciation keeps one going, the varied milestones, both good and bad achieved during a research pursuit adds to the quality of the output. I would encourage the researchers to be fearless in their journey and not be afraid of failures because it is in these failures that you will find your success story.

On a parting note, I would like to encourage the researchers to measure their research potential in terms of nation-building and constantly preserve to give back to society and to the nation in any way possible. I congratulate the awardees and wish them many more laurels in the future.

With Regards

(Manoj S Gaur)
